

**深不可测的奥秘...**

**A story of hidden depth...**

**杂卤石的施用促进马来  
西亚农作物的生长与产量**

**Improving the growth and yield of  
crops in Malaysia with Polyhalite**

**谢征祥, 东南亚高级农艺师, 以色列化工集团特种肥料**  
**Seh Cheng Siang, Senior Agronomist (SEA), ICL Specialty Fertilizers**

# 杂卤石在马来西亚的 田间试验效果如何？

Polyhalite trial results  
from Malaysia?

田间试验证明  
杂卤石更加有效

Trials prove that  
Polyhyllite is more efficient

复合肥

Compound Fertiliser

叶子较多弯曲与缺水症状  
Curved leaves & more symptom on water deficiency

复合肥 + 杂卤石

Compound Fertiliser + Polyhalite

叶子较绿、较厚与叶子较少弯曲  
Leaves are greener, thicker and less curved leaves

复合肥

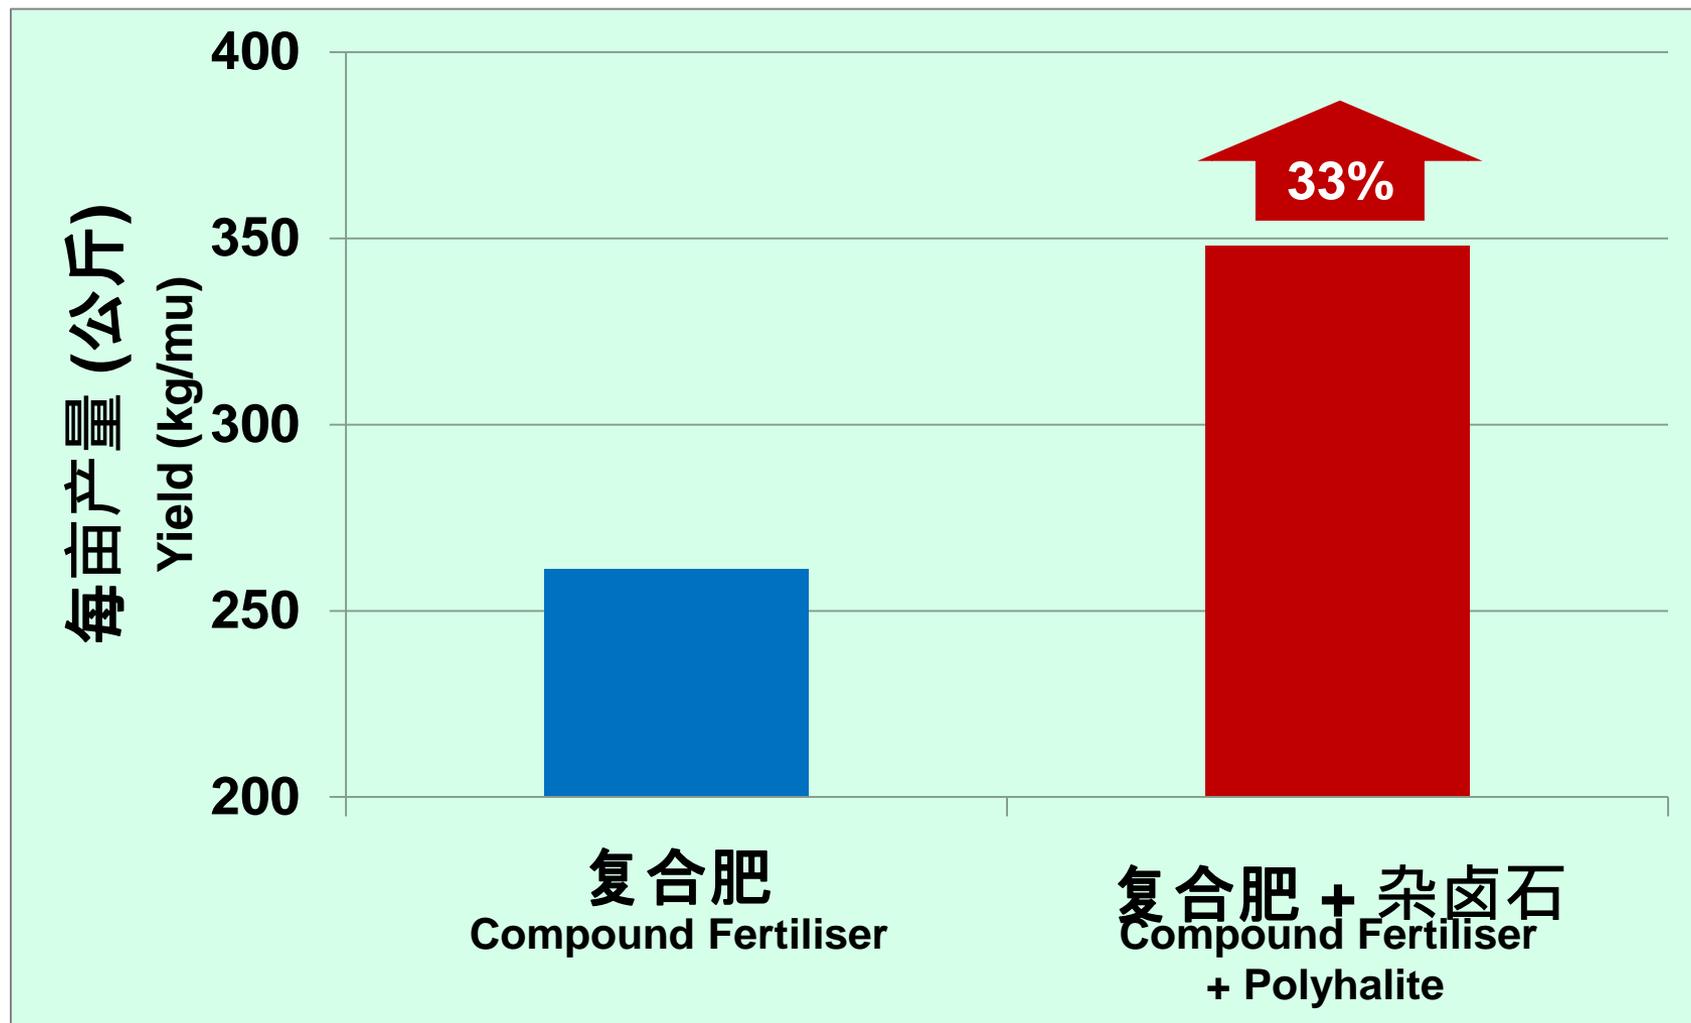

Compound Fertiliser

叶子较多弯曲与缺水症状  
Curved leaves & more symptom on water deficiency

复合肥 + 杂卤石

Compound Fertiliser + Polyhalite

叶子较绿、较厚与叶子较少弯曲  
Leaves are greener, thicker and less curved leaves

有机肥  
Organic Fertiliser

有机肥 + 杂卤石  
Organic Fertiliser +  
Polyhalite

**有机肥**  
**Organic Fertiliser**

**较小的根部**  
**Smaller root**

**较多缺钙的症状**  
**More on Calcium deficiency**

**有机肥 + 杂卤石**  
**Organic Fertiliser + Polyhalite**

**较健壮的根部**  
**Stronger root**

**较大的叶子并没有缺钙的症状**  
**Bigger leaves & no Calcium deficiency**

复合肥  
Compound Fertiliser

切花品质一般，枝干与花朵较小  
Normal quality on cut flowers, smaller stems and flowers

复合肥 + 杂卤石  
Compound Fertiliser + Polyhalite

切花品质较好，枝干与花朵较大  
Better quality on cut flowers, bigger stems and flowers

复合肥  
Compound Fertiliser

杂卤石  
Polyhalite

较多缺钾症状  
More symptom on Potassium deficiency

较少缺钾症状  
Less symptom on Potassium deficiency

复合肥  
Compound  
Fertiliser

糖度介于13-16%  
13-16% Brix

杂卤石  
Polyhalite

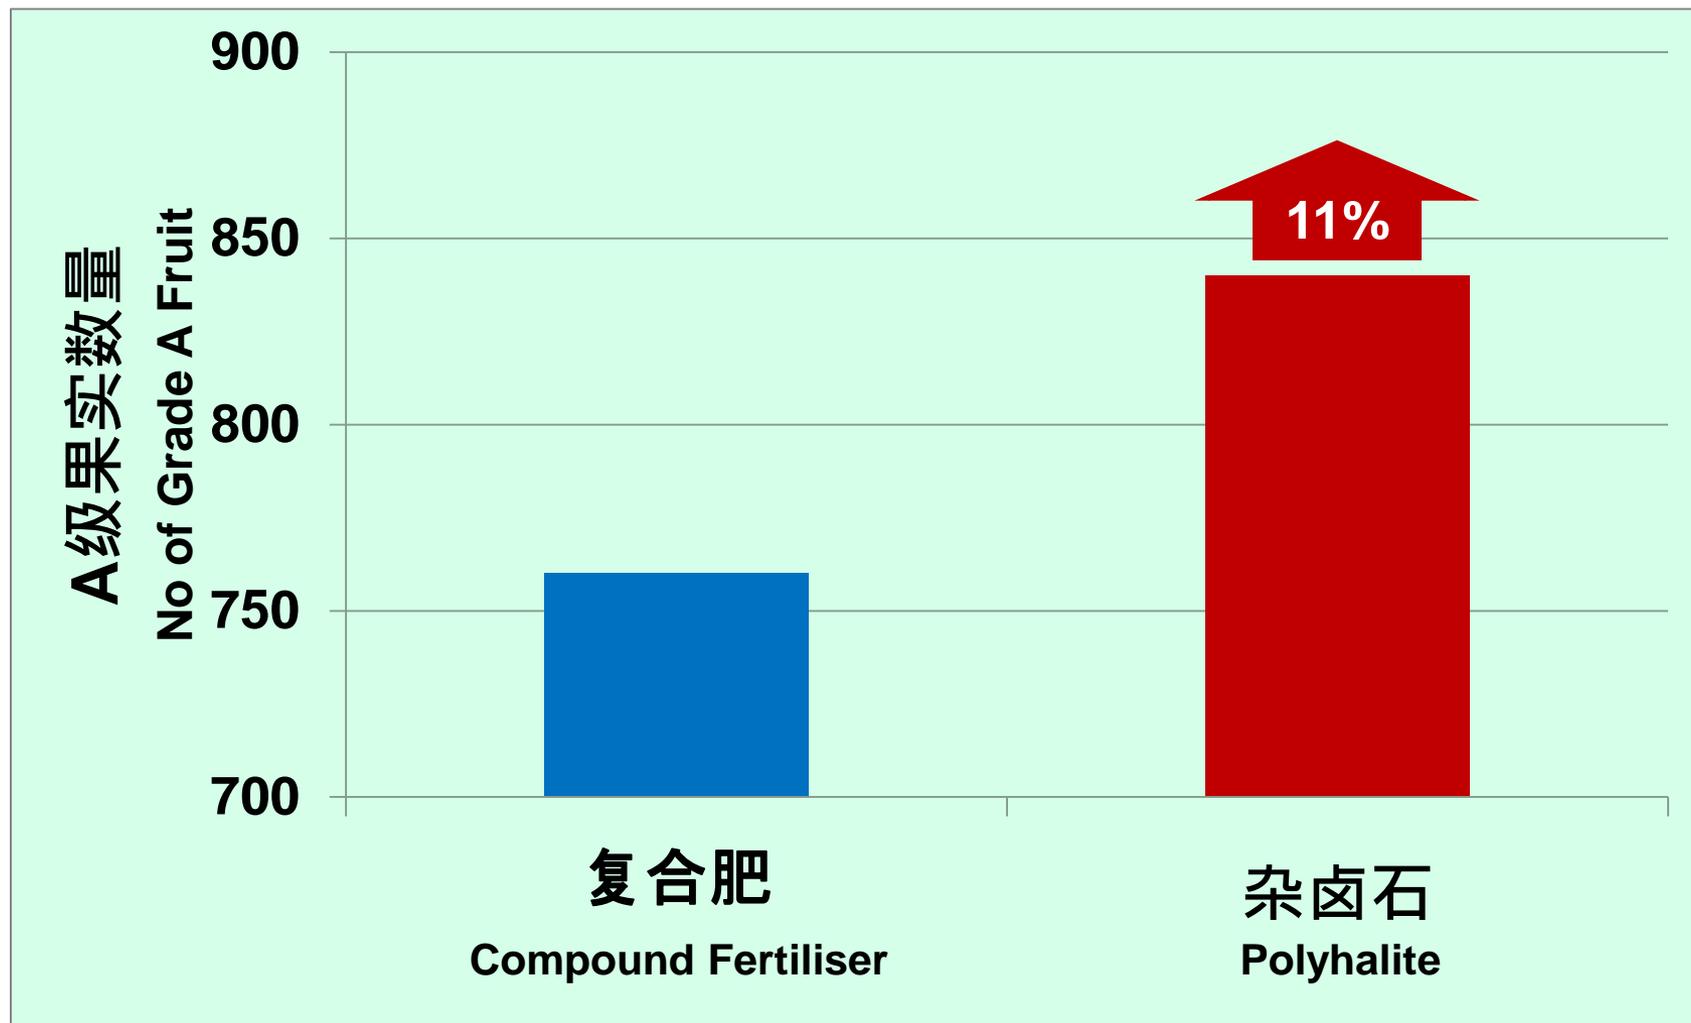

糖度介于16-19%  
16-19% Brix

较差的保鲜期  
Shorter shelf life

较长的保鲜期  
Better shelf life

各式单一肥  
Straight Fertilisers

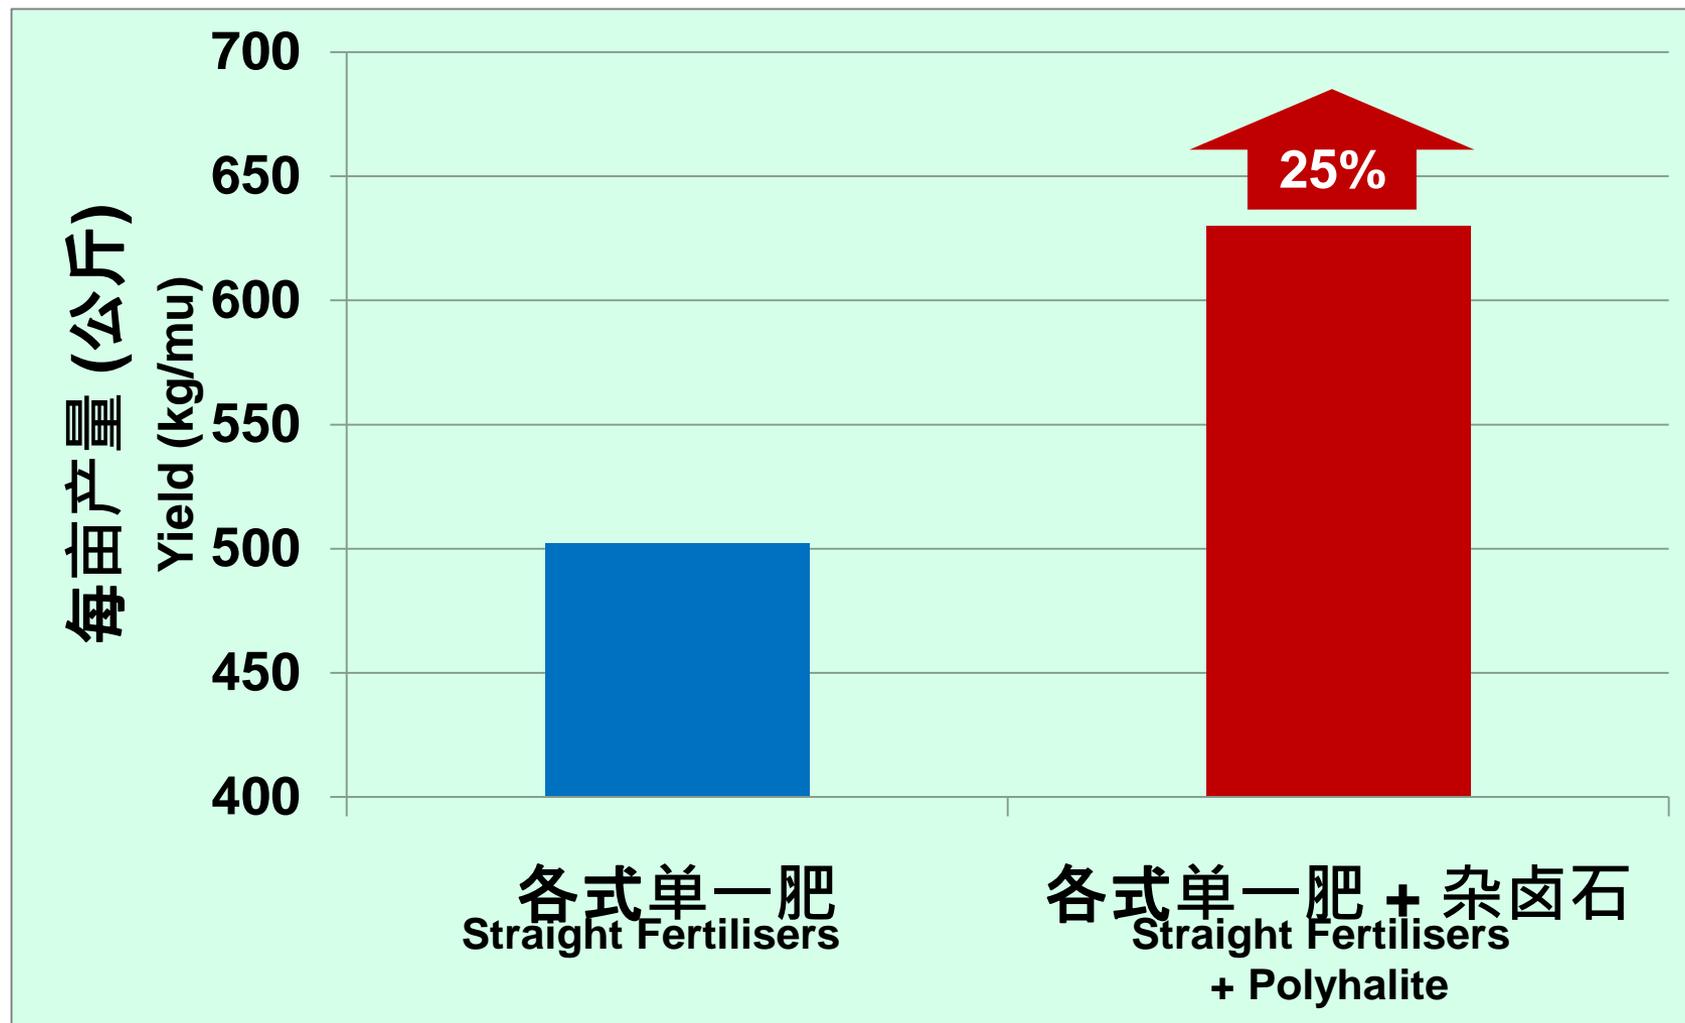

较多缺钾症状，  
较少与较小颖的谷粒  
Symptom of K deficiency, less number of  
grain per tiller & smaller grain

各式单一肥 + 杂卤石  
Straight Fertilisers + Polyhalite

较少缺钾症状，  
较多与较饱满的谷粒  
Less symptom of K deficiency, more  
number of grain per tiller & bigger grain

施用杂卤石后，谷粒更大更饱满，产量显著增加  
After apply Polyhalite, the grains are bigger, yield increased

多个榴莲试验已在马来西亚进行长达一年，  
所有农民对杂卤石的功效赞不绝口  
Few Durian field trials are going on in Malaysia,  
growers are satisfied with the performance of Polyhalite

在马来西亚榴莲园，杂卤石可持续释放养分长达2个月  
In Durian farm of Malaysia,  
Polyhalite is able to provide continuous nutrients up to 2 months

复合肥  
Compound Fertiliser

口感与香味一般, 较多裂果  
Normal texture & aroma, more cracking

复合肥 + 杂卤石  
Compound Fertiliser + Polyhalite

口感较好与香味浓厚, 较少裂果  
Better texture & aroma, less cracking

# 其它作物 Other Crops

黄瓜  
Cucumber

番石榴  
Guava

辣椒  
Chilli

苦瓜  
Bitter gourd

西红柿  
Tomato

叶菜  
Leafy Vegetables

香蕉  
Banana

# 为什么杂卤石在 马来西亚广受欢迎？

Why Malaysian growers  
like Polyhalite?

杂卤石提高农作物  
的质量与产量

Polyhalite improves  
yield and quality

相辅  
相成

Complement  
each other

缓慢  
释放

Prolong  
release

有机  
认证

Organic  
certified

提色  
增香

Improves  
colour &  
flavour

微量元素 :

Fe, Zn, Cu, Mn,  
Al, B, Mo & Cl

中量元素 :

S, Ca & Mg

大量元素 :

N, P & K

14%  
K<sub>2</sub>O

**钾(K):** 增加产量  
Increases yield

48%  
SO<sub>3</sub>

**硫(S):** 提高氨基酸  
Improves amino acid

6%  
MgO

**镁(Mg):** 提高光合作  
Improves photosynthesis

17%  
CaO

**钙(Ca):** 增强细胞外层  
Strengthens cell wall

连续养分，匹配需求，减少流失与浪费

Continuous nutrient supply, matching to demand, reduces wastage

适用于  
有机耕种

Approved  
for organic  
agriculture

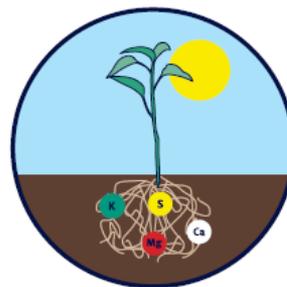

无有  
害物质

Completely  
natural

环保

Environ-  
mental  
friendly

全溶性

Fully  
soluble

pH7、低  
氯和低盐

pH7, low Cl  
& low sodium

硫提高果实的硫醇(Thiol)与酯 (Ester)

Sulphur increases the Thiol & Ester in fruit

达到提色增香的效果

Improves the colour & flavour

榴莲、芒果、西红柿等果实需要比其它农作物更高的硫

Some fruiting crops likes durian, mango & tomato require more Sulphur than other crops

Malaysia Musang King Durian
